This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This international search report consists of a total of 5 sheets.

☐ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ The international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

b. ☐ With regard to any nucleotide and/or amino acid sequence disclosed in the international application, see continuation of this first sheet.

2. ☐ Certain claims were found unsearchable (see continuation of this first sheet)

3. ☐ Unity of invention is lacking (see continuation of this first sheet)

4. With regard to the title,

☒ the text is approved as submitted by the applicant.

☐ the text has been established by this Authority to read as follows:

5. With regard to the abstract,

☐ the text is approved as submitted by the applicant.

☒ the text has been established, according to Rule 38.2(b), by this Authority as it appears in the continuation of this first sheet. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

☒ as selected by this Authority, because this figure better characterizes the invention.

b. ☐ none of the figures is to be published with the abstract.

Continuation of first sheet

IAP11 Rec'd PCT/PTO 14 JUL 2006

Continuation No. IV:

Text of the abstract

(Continuation of item 5 of the first sheet)

Disclosed are a certification mobile terminal (500), and an electronic transaction system and method using the same. A certificate is downloaded to a mobile terminal (500) from a certification authority (600). In a wired electronic transaction, a user's transaction history is provided to the mobile terminal (500) from a service providing server (300) or a user's transaction terminal (200), and the mobile terminal (500) digitally signs the transaction history by using a stored digital certificate and provides the digitally signed transaction history to the service providing server (300) or the transaction terminal (200) so that the service providing server (300) may finally receive the digitally signed transaction history. The service providing server (300) settles the transaction with the user according to the digitally signed transaction history, and provides a service to the user.

Also, in the offline transaction, the certificate stored in the mobile terminal (500) is provided to a system to thereby execute stable transactions based on the certificate.
